## OVERALLDRAWING

## SPECIFICATIONS

1	Fabricated Lifting Bag	High tenacity 1 000 Denier Nylon coated both sides with plasticised PVC. Double skin to top and base.
2	Inlet Connector welded to bag	Inner mechanical connection of glass reinforced polyamide. overmoulded in PVC.
3	Exhaust Connector Cone	Rubber injection moulding
4	Bag Connector/Valve	Glass reinforced polyamide moulding.
5	Hose—6 metres (20 feet)	UV resistant EPDM rubber extruded lay-flat tube.

## DIMENSIONS

Model	Weight		Diameter		Height		Lift Capacity	
	Kg		Cm	InS	Cm	Ins	Kilos	Lbs
EJ-3	4.60		50	19.69	63	24.80	3,000	6,600
EL-4	6.00		60	23.60	78	30.70	4,000	8,800

## PRODUCT APPLICATIONS

Use the vehicle's own low pressure exhaust to inflate the exhaust jack. It's capable of jacking the vehicle out of ruts or holes, to change a wheel or to install snow chains; Lifting any Heavy, Awkward objects; Pushing heavy objects; Temporarily securing loose loads. Great for use if you are stuck in sand, mud, snow or softground.

## PRODUCT TIPS

Comes with a complete kit including a pair of work gloves to keep your hands clean and protected, a puncture repair kit in case the bag is pierced, laminated operating instructions and handy carry bag in which to store everything, ready for use.

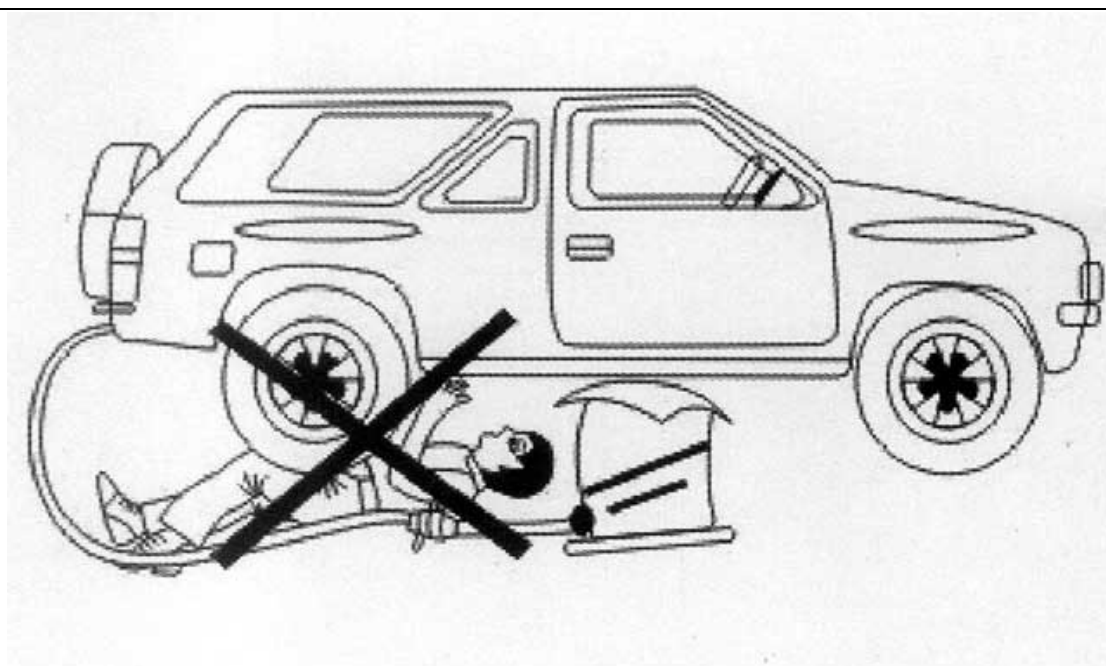

## Features:

- 1) Will safely lift your vehicle up out of a rut or bog in seconds.
- 2) Simple to use without the risk of damage to your vehicle as can happen with a high lift jack.
- 3) An essential piece of equipment which you need to always have in your vehicle for emergencies.
- 4) It is equally at home in the heat of an African desert, or the frozen landscapes of Alaska

## Safety precautions:

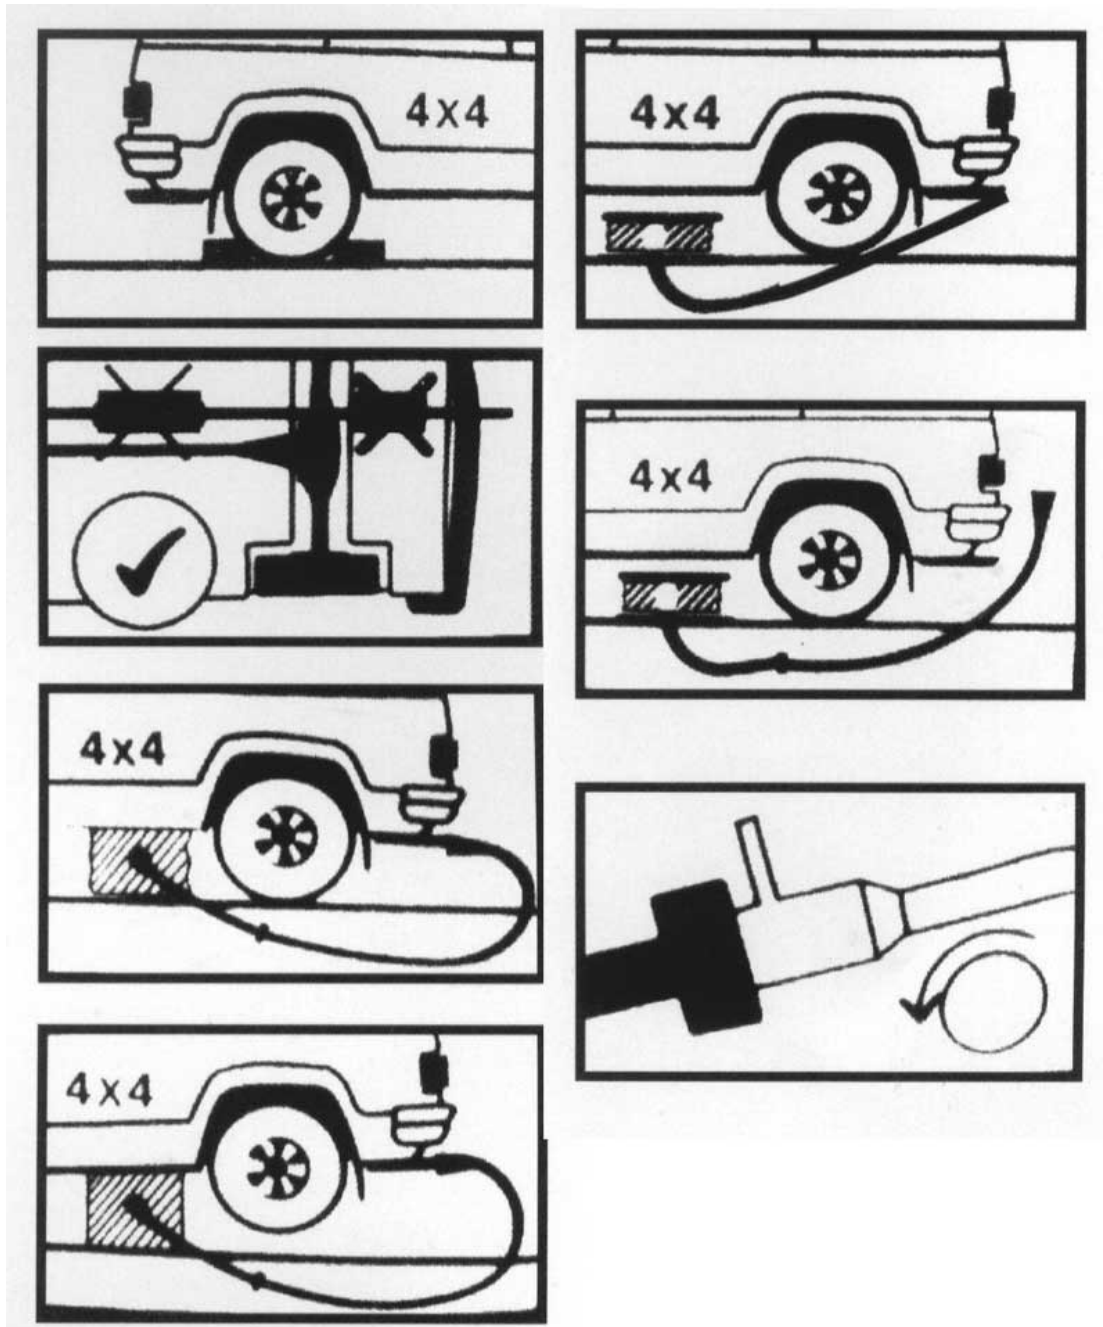

- 1) Never allow any part of your body to be under the vehicle when it is supported only by the exhaust jack
- 2) Be aware that vehicle's exhaust fumes are poisonous if inhaled in large quantities. Therefore do not use the exhaust jack in a confined area and always turn off engine when not inflating the jack.
- 3) Always chock both front and rear wheels opposite to the side under which the jack is being used and apply the handbrake
- 4) When placing the exhaust jack under the vehicle, ensure the bag is away from hot or sharp underbody parts and clear away sharp sticks from the ground
- 5) It is essential to use the protective mats provided to help to prevent puncturing the bag
- 6) Do not over-inflate the bag, 90% capacity is ample

**WARNING** Never allow any part of your body to be under the vehicle when it is supported only by the exhaust jack

#### FTTING & CARE INSTRUCTIONS(Included in Product Packaging)

Note: Kit includes safety gloves, puncture repair kit, protective mats plus a convenient carry bag for the complete Exhaust jack kit

1. Securely chock wheels on side of Vehicle opposite to that being lifted.
2. Select a strong underbody location free of sharp objects and clear of hot exhaust pipes and mufflers.

NOTE: By moving the position of the bag, one side of the vehicle can be lifted.

3. Place Product under vehicle at selected location with one flat surface on the ground and the other ready to support the vehicle. "Use protective mats top and bottom".
